
Life Safety Code Workshop

Missouri Association of Nursing Home Administrators and Kenn Daily, LNHA, President of Elder Care Systems Group - Ohio, will offer an intensive 2-day training focused on the requirements of NFPA 101 Life Safety Code and NFPA 99 Health Care Facilities Code for skilled nursing centers. This training is designed for facility and maintenance managers, environmental services directors, administrators, and long-term care safety consultants. This unique program will help you understand practical applications of the Life Safety Code and learn from a life safety expert on what to prepare for during survey.

This comprehensive program will examine all sections of the LSC applicable to skilled nursing, and provide forms, policies, and best practice guides for use by healthcare organizations. Using real life examples and survey scenarios, attendees will explore how these codes apply to nursing facilities, discuss code changes and the increased inspection, testing and maintenance (ITM) requirements, and review common violations.

Early Bird Registraton available until end of day November 1st, 2024:

Manha Member	\$235 per person
Non-Member	\$260 per person

After November 1st, 2024:

Manha Member	\$250 per person
Non-Member	\$275 per person

The seminar registration fee includes lunch on both days, continuing education certificate, printed handouts and additional resources provided electronically. Continental breakfast, coffee and iced tea will be provided.

Cancellation Policy

Cancellations can be made 5 days prior to seminar for a refund minus a \$25 processing fee. No refunds will be given after that date. You may send a substitute.

Objectives:

1. Review expectations regarding the ITM of required systems such as sprinklers, fire panel, fire extinguishers, smoke detectors, doors, etc.
 2. Discuss LSC requirements for nursing homes including current surveyor priorities.
 3. Examine LSC priorities including issues related to culture change and the environment.
 4. Discuss the leading LSC deficiencies.
 5. Recommend policies, standards and/or guidelines for immediate review and facility implementation.
-

Kenneth Daily, LNHA
President, Elder Care Systems Group
Life Safety and Emergency Management Specialist

Kenneth Daily, LNHA and founder of Elder Care Systems Group, has a long track record of working with LTC professionals throughout the nation. In 2004, Kenn learned first-hand the critical importance of the Life Safety Code and Emergency Preparedness for senior living centers when a facility operated suffered a significant fire event. No resident or staff member was injured but the facility sustained millions in damages taking more than a year to complete reconstruction.

Empowered by this experience, Kenn set to learn and share with health care professionals the importance with compliance with the NFPA's Life Safety Code, ensuring the safest building for those we serve. Of equally critical importance was that facilities must be prepared for emergencies which are never expected but do occur. With the implementation of CMS's Emergency Preparedness mandate, Kenn has worked with 100s of facilities focusing on being better prepared for those things we cannot control. As Kenn has said many times, "you cannot control the environment, but we can control the facility's response".

Today, Kenn is one of the leading Life Safety and Emergency Preparedness Specialists in the country focusing on senior living. Serving more than 22 years on the Ohio Health Care Association's Board of Trustees and chairing the Association's Life Safety and Disaster Management Committee for nearly 20 years. Kenn also serves on the American Health Care Association Life Safety – Disaster Management Committee as well as the National Fire Protection Association Health Care Committee and its Executive Board.

A frequent and engaging speaker having lectured nationwide at professional conferences, trainings and other sponsored events sharing insights on long term care operations, quality, survey, disaster management and life safety code as well as authoring and editing numerous articles and professional manuals.

Registration Form for Life Safety Code Workshop

Attendee 1: _____ Admin # _____

Attendee 1 Email: _____

Attendee 2: _____
